

### **The RF Alliance to Sponsor SBIR Beyond Phase II Conference**

**CRANE WESTGATE, INDIANA – September 10, 2010** Representatives from the Radio Frequency Alliance will be participating in the 2010 National SBIR Beyond Phases II Conference and Technology Showcase 13-17 September 2010 in San Antonio, TX.

By bringing together small and large businesses, Defense Department Acquisition program managers, and representatives from other government organizations/offices that acquire technology products and services, this event showcases technologies and provides a forum for commercialization opportunities.

With participation in the conference, RF Alliance personnel will 1) highlight the RF technologies of members to company and organizational attendees who would benefit from the transition of member technologies to their products, 2) learn of additional opportunities and methods for inserting and maturing emerging technologies and 3) seek new partnerships and teaming members.

Hosted by the Defense Department with support from all 11 Federal Agencies active in small business innovative research, the annual Beyond Phase II Conference and Technology Showcase serves as an excellent venue to highlight the capabilities provided by emerging RF Technologies.

The RF Alliance is a non-profit chartered organization, located at Westgate Technology Park in Crane, Indiana, whose goal is to transition innovative advanced RF technologies benefitting military and commercial applications. This is done by promoting strategic relationships that synergize and expand available RF assets, resources, and education. The RF Alliance expands the RF knowledge, technology, and industrial base by building RF related academia, industry, and government partnerships and stimulates the technical workforce by fostering K-12 and post-secondary STEM education.
